PRESENT PROFILE

Currently working as **Signal Engineer** in Western Railways at Mumbai Central Division. This is key position in Railways and **ensures safe Train operations** and maximizing the utilization of fixed and moving assets through interlocking (logic design) which is the single most important aspect for ensuring safe train running.

Apart from this role I am actively involved in **Web Application Development**, Mobile Apps architecture and Design, **Data analytics and visualization** for decision making at higher level to list a few. But that does not end the chapter of my daily routine. I pursue my **hobbies** such as guitar playing, chess, reading varieties of books and most importantly **Teaching**

WHY TEACHING?

Long story short - "I love teaching and I feel so confident about it".

I have been in a profession of teaching since 2012 when I was pursuing my engineering. I am proud that whatever I am today it's only because of my passion towards teaching. I was fortunate enough to impart education to the most underprivileged students and I will not hesitate to say that I was one of them in past. One of the reasons for becoming a teacher is to contribute to your community in a meaningful way. Teaching is one of the most direct ways to make an impact on so many life, and I am driven by the desire to spread the knowledge to those around me, being a teacher is an invaluable contribution.
